Wiring example Start/Stop - By-pass (90 mm modul)

Auxiliary SCR output contact 13-14 (AC voltage only) is used for controlling a Start-Stop function directly wired to the soft starter. Auxiliary SRC output contact 23-24 (AC voltage only) is activated when the ramp-up time has elapsed. Is used for by-passing the soft starter with an external connected electromechanical contactor.

Wiring example Start/Stop - By-pass (180 mm modul)

Auxiliary SCR output contact 13-14 (AC voltage only) is used for controlling a Start-Stop function directly wired to the soft starter. Auxiliary SRC output contact 23-24 (AC voltage only) is activated when the ramp-up time has elapsed. Is used for by-passing the soft starter with an external connected electromechanical contactor.

Short-circuit protection by circuit breaker or fuses

Two type of short-circuit protection can be used:

- Short-circuit protection by circuit breaker.
- Short-circuit protection by fuses.

Short-circuit protection is divided into 2 levels **Type 1** or **Type 2**

Co-ordination Type1: Short-circuit protects the installation

Co-ordination Type 2: Short-circuit protects the installation and the semi-conductors inside the motor controller

a) Short-circuit protection

Co-ordination type 1 will be obtained when using magnetic circuit breakers or standard gI/GI fuses.

Co-ordination type 2 will be obtained when using semiconductor fuses. When using semiconductor fuses the SCR will not be damaged due to transients and short circuits. The table indicates suitable fuses for co-ordination type 2 protection.

b) Short-circuit protection by fuses

Type 1: SMC 33 DA XX15	Protection max. 50 A gL/gG
Type 1: SMC 33 DA XX25 BP	Protection max. 80 A gL/gG
Type 1: SMC 33 DA XX40 DBP	Protection max. 80 A gL/gG
Type 1: SMC 33 DA XX50 BP	Protection max. 125 A gL/gG
Type 1: SMC 33 DA XX85 DBP	Protection max. 125 A gL/gG
Type 2: SMC 33 DA XX15	Protection max. i _{2t} of the fuse 1800 A ² S
Type 2: SMC 33 DA XX25 BP	Protection max. i _{2t} of the fuse 6300 A ² S
Type 2: SMC 33 DA XX40 DBP	Protection max. i _{2t} of the fuse 6300 A ² S
Type 2: SMC 33 DA XX50 BP	Protection max. i _{2t} of the fuse 25300 A ² S
Type 2: SMC 33 DA XX85 DBP	Protection max. i _{2t} of the fuse 25300 A ² S

Fuses from e.g. Ferraz, Siba, Bussmann can be used as short-circuit protection Type 2
