

product type designation

product description

Plug-in cable, USB (Type A) / board connector

Standard cable for USB

SIMATIC RF1000 USB connecting cable for RF1000 reader Length 0.5 m;

Figure similar

suitability for use

short plug-in cable for connecting an RF1000 reader to the PC

wire length

0.5 m

electrical data

number of electrical connections

2

type of electrical connection

USB connector (type A) / wire-to-board connector

mechanical data

number of electrical cores

4

ambient conditions

ambient temperature

- during operation -25 ... +55 °C
- during storage -25 ... +55 °C
- during transport -25 ... +55 °C
- during installation -25 ... +55 °C

standards, specifications, approvals

reference code

- according to IEC 81346-2 WG
- according to IEC 81346-2:2019 WGB

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available

and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
