

KDN451E

**Kamrail vork 3x(P+N) 16 mm<sup>2</sup> 54 modulen**

## Technische eigenschappen

### Stroom / temperatuur

|                 |      |
|-----------------|------|
| Nominale stroom | 80 A |
|-----------------|------|

## Uitvoering

|               |   |
|---------------|---|
| Aantal pollen | 4 |
|---------------|---|

## Afmetingen

Length 1000 mm

## Spanning

|                                             |        |
|---------------------------------------------|--------|
| Nominale stoothoudspanning U <sub>imp</sub> | 4500 V |
|---------------------------------------------|--------|

|                      |             |
|----------------------|-------------|
| Nominale spanning Ue | 230 - 400 V |
|----------------------|-------------|

## Aansluiting

|                                 |                    |
|---------------------------------|--------------------|
| Aansluitdoorsnede massieve ader | 16 mm <sup>2</sup> |
|---------------------------------|--------------------|

|                       |                              |
|-----------------------|------------------------------|
| Type connector/steker | Doorverbindingsrail met vork |
|-----------------------|------------------------------|

## Capaciteit

|                |    |
|----------------|----|
| Aantal modulen | 54 |
|----------------|----|
